

## Introduction to the NCSU Libraries Information System

**T**his two-hour class provides an overview of the NCSU Libraries Information System. The first hour focuses on connecting to the information system from a remote computer and finding NC State books and journals through the online catalog. The second hour describes additional information that can be found through the information system, including locating other library catalogs; searching for government documents and articles in journals, magazines, and newspapers; and finding Internet resources on the Libraries' World Wide Web Server.

All library users are welcome. No prior registration is necessary, but seating is limited. More than thirty sessions are available throughout the semester, including nights and weekends [see detailed course schedule below]. All courses are held in the Libraries' Information Technologies Teaching Center (ITTC), PC Lab. It is located on the second floor of the East Wing, D. H. Hill Library. # Exploring the Internet Workshop Series Fall 1996

The NCSU Libraries' Research & Information Services Department is offering a series of workshops to help faculty, staff, and graduate students discover and evaluate Internet resources in their subject areas. The workshops will highlight useful, high-quality sites in specific disciplines and will focus on techniques for exploring the Internet to identify new resources. The workshops are designed for participants who have some experience using computers and are connected to the Internet. For individuals needing a basic introduction to

Internet tools, call the NC State Computing Center for its course schedule.

To register for subject-oriented workshops, send an e-mail message to:

sharon\_webster@ncsu.edu

Indicate the course(s) you wish to attend and include the section number(s) listed below. You will receive a confirmation of your registration status. If you do not have access to e-mail, call Sharon Webster at ext. 5-2936 to register.
